FlexoGraf-L

Cover Type:	Rubber
Possible applications:	Recommended coating for flexographic printing cliché rollers
Recommended Cover Thickness:	min. 10 mm - max. 25 mm
Temperature resistance:	Dry: continuous 110°C / peak 130°C Wet: continuous 80°C / peak 100°C
Properties and advantages:	Excellent resistance to water, ozone and bad weather conditions Very good resistance to ketone solvents and acetates Low resistance to oil and grease This coating can be laser engraved
Chemical resistance:	Acid solutions: Excellent Alkaline solutions: Excellent Hot water and steam: Very good Ozone: Excellent Oil and grease: Not suited Aromatic solvents (toluene, benzene,...): Not suited Chlorinated solvents: Not suited Polar solvents (MEC, ether, acetate,...): Very good
Recommended cleaning products:	Water and compatible solvents
Remark:	This coating can be applied on a metallic roll as well as on a glass fiber sleeve
