

HANNEFLEX

THE ALL IN ONE SOLUTION FOR YOUR APPLICATOR ROLLERS

HanneFlex is a roller covering of superior quality, especially developed for applicator rolls in the flexography sector where water based inks are being used.

Applications

HanneFlex particularly stands out from classic coverings thanks to its exceptionally long service life and eminent ink transfer. The use of HanneFlex is particularly recommended for printing jobs in the flat and corrugated board packaging industry.

Technical characteristics

- Available hardnesses: **60 & 65 Shore A**
- Colour: **dark blue**
- **High precision grinding**
- Suitable for **all brands of flexographic impression machines.**

Operating Precautions

- As for all types of applicator rolls, we strongly dissuade you from “running dry” with HanneFlex
- When performing cleaning operations, always avoid aromatic solvents and ‘Recyl Clean’ like products.
- In general, most of the cleaning agents that are recommended by your ink suppliers can be used without any trouble.

THE ADVANTAGES OF HANNEFLEX

- Service life is up to 6 times higher than for classic coverings
- Exceptional cut and abrasion resistance: we will gladly give you a demonstration
- Excellent impact resilience which enables you to put less pressure between the applicator roll and the transfer roll.
- Excellent retention and transfer properties
- Improved resistance towards inkresidue and paper dust
- Also recommended to replace classic coverings
