

Cover Type:	Special rubber
Possible applications:	Steel industry : preferred solution for hold-down, pressure and squeegee rollers on chrome plating lines, when high hardness is requested High hardness rubber cover for any environment combining temperature, abrasion, corrosion and pressure
Hardness Range:	95 Shore A
Recommended Cover Thickness:	min. 10 mm - max. 25 mm
Temperature resistance:	Dry: continuous 125°C / peak 140°C Wet: continuous 85°C / peak 95°C
Properties and advantages:	Special cover with very high chemical stability in corrosive and oxydative environment, like chromic acid High load resistance
Chemical resistance:	Acid solutions: Excellent Alkaline solutions: Very good Hot water and steam: Very good Ozone: Very good Oil and grease: Good Aromatic solvents (toluene, benzene,...): Moderate Chlorinated solvents: Not suited Polar solvents (MEC, ether, acetate,...): Not suited
Recommended cleaning products:	(Warm) water, soap, industrial cleaners and detergents, alcohol, acid and alkaline cleaners
